

Let's Talk About Health!

What are your children learning in health class?

Is the school, or are teachers indoctrinating your children?

Are students being provided lessons on "How to..."?

Why not find out for yourself?

We will be hosting parents, guardians, and members of the community that would like to learn more about our health curriculum next week. In order to be able to focus on educating your children, our students, we must first dispel any myths or rumors regarding the health curriculum. We will provide a 30-minute presentation on the scope, sequence, and two specific lessons (Gender Identity and Sexting) next **Thursday, 10/27/22 at 6 p.m.**

Since we will be reviewing what are perceived to be sensitive topics, no children will be allowed.

Presentation will be held in the Riverdale School Library
